REDROCK International

Cities

Teams assemble cranes and equipment, then build their city one block at a time.

In this construction challenge, teams assemble their own crane and use it to build a city, one block at a time. Every project adds to the score, but only if it is finished.

Duration
1–3 hours

Setting
Indoor or outdoor

Participants
50–800+

How it works

1

Build the crane

Each team assembles and tests its crane, with a crane specialist on hand to help with knots, placement and building technique.

2

Choose projects

Teams decide which construction projects to take on. Harder projects score more, but only finished ones count.

3

Trade and negotiate

Team captains meet in the central exchange to trade equipment, negotiate and share ideas with the other teams.

4

Build the city

Teams build their city block by block. The team with the highest score from completed projects wins.

What Cities develops in your team

In every Red Rock team build

- **Teamwork and collaboration**
- **Relationships and trust**
- **Communication**

Cities also develops

Planning
Teams map out their city and agree the order of building.

Strategic thinking
Teams decide which construction projects to take on as their city grows.

Shared vision and values
The finished city shows what the group can build together.

Trainer-led review

Cities ends with a review led by our trainers. We agree the focus with you beforehand and build the review around it.

Teams talk through what happened, link it to how they work together day to day, and agree what they will do differently back at work.

We can also organise

- **Venue**
- **Catering**
- **Travel**
- **Branding**
- **Giveaways**
