Interviewing skills

A Job Interview Is Not A Test Of Your Knowledge, But Your Ability To Use It At The Right Time.

The aim of this course is to guide you step by step when conducting an interview as interviewing is a skill in and of itself.

Overview

Interviewing is an interactive process, wherein an interviewer explores more about a person in a particular context. The main tool used is questioning and probing. The process has a logical sequence of steps, meaning it is important to understand the process then fine-tune it with our individual style as artistically as possible.
